Thank you for contacting the Brain Bio Centre. This is the first clinic of its kind in Britain to offer comprehensive diagnostic and nutrition-oriented treatment for those with mental health concerns.

After 20 years research at the Institute for Optimum, working with literally thousands of clients, we feel confident to say that this approach is highly effective. It should, in our opinion, be the first port of call, not the last, for a wide range of mental health concerns including autism, schizophrenia, depression, anxiety, bipolar disorder, learning difficulties, dyslexia, dyspraxia, dementia, and Alzheimer’s disease.

If you are relatively new to optimum nutrition and its proven benefits for mental health I strongly recommend you read my book, Optimum Nutrition for the Mind. This book also contains 500 scientific references showing how effective this approach is and is the best background reading for yourself and your doctor, should you want to inform them about this approach. You will also be able to read a small number of the hundreds of success stories from former clients, both children and adults. The book is available in any bookshop or by mail order by calling 020 8871 2949 or by visiting www.brainbiocentre.com. This book gives you invaluable information to support you through your Brain Bio Centre treatment.

If you would like to come and see us, please complete the Patient Information Questionnaire, which is included, and return it to us with a signed copy of the Terms and Conditions, and a payment of £50, which will be used as a deposit towards your first appointment.

Once we receive your Questionnaire, we will contact you to arrange an appointment at our Clinic in Richmond, south west London.

May I take this opportunity to wish you the very best of health and let you know that my team and I will do our utmost to bring you to the point of optimal health.

Yours sincerely

Patrick Holford
Director of the Brain Bio Centre
Founder of the Institute for Optimum Nutrition
BRAIN BIO CENTRE
at the Institute for Optimum Nutrition

The Brain Bio Centre is an outpatient clinical treatment centre, specialising in the 'optimum nutrition' approach to mental health problems. The centre offers a comprehensive assessment of biochemical imbalances that can contribute to mental health problems, plus advice to correct these imbalances as a means to restore health. The Clinic is located at the Institute for Optimum Nutrition, founded by Patrick Holford in 1984.

Conditions That May Be Helped
We work with any person who has a mental health concern. A wide variety of mental health problems have been helped through the optimum nutrition approach. These include depression, anxiety, bipolar disorder, schizophrenia, 'brain fog', fatigue, learning difficulties, dyslexia, dyspraxia, autism, dementia, and Alzheimer's disease.

The Treatment
As a treatment centre of excellence, patients are accepted on the basis of being willing to have a thorough mental health and biochemical assessment and to follow through with nutritional management under medical supervision, over a minimum of a six month period.

Consultations
The initial appointment usually takes one hour. Subsequent appointments with the clinical nutritionist are generally for half an hour.

A 20 minute appointment with our psychiatrist may be required for some people prior to the Initial Appointment with the clinical nutritionist.

A more extensive Psychiatric Assessment appointment with the doctor is also available to anyone at any time. In general, most people meet with a clinical nutritionist three to four times over the course of about six months. They may also meet with the psychiatrist once or twice.

Location
The Brain Bio Centre is located at the Institute for Optimum Nutrition (ION), Avalon House, 72 Lower Mortlake Road, Richmond, Surrey TW9 2JY.

Tests
Biochemical screening through blood, urine and hair samples, may include:
- **Food allergies** using quantitative ELISA IgG analysis
- **Mineral imbalances** using hair, sweat and blood mineral analysis
- **Pyroluria** using urinary reagent analysis
- **Neurotransmitter imbalances** using blood platelet determinations of serotonin, noradrenalin, histamine and plasma acetylcholine
- **Homocysteine imbalance** using blood plasma
- **Essential fatty acids** using red blood cells
- **Urinary peptides** using urine analysis

Further tests to investigate specific issues may also be recommended where appropriate.

Psychometric screening involves straightforward questionnaires, completed prior to the first consultation.

Costs
The cost of the programme will vary from patient to patient, depending on the tests, consultations and nutritional supplements required.

Over several months, most patients spend between £600 to £1100 on consultations and tests, plus between £2 and £3 per day for supplements. The supplement programme varies from person to person and is reassessed and adjusted as the patient progresses.

Appointments
To arrange an appointment for a consultation at the Brain Bio Centre, call 020 8332 9600.
People

Patrick Holford BSc, DipION, the clinic director, trained in psychology in the 1970s and went on to specialise in the nutritional treatment of mental health problems. He became a student of Dr Carl Pfeiffer in Princeton, New Jersey, and Dr Abram Hoffer, former psychiatric research director in Canada. He is the UK representative of the International Society for Orthomolecular Medicine. Since the 1970s Patrick Holford has successfully treated thousands of patients and carried out original research on schizophrenia and learning difficulties, including ground-breaking research in the mid-80s that proved that vitamin supplements could increase IQ scores in children. He is author of the book *Optimum Nutrition for the Mind* and is regularly called upon as the nutrition expert for radio and television features. Patrick Holford is a Fellow of the British Association for Nutritional Therapy.

Deborah Colson DipION is a clinical nutritionist trained at the Institute for Optimum Nutrition. She specialises in the nutritional management of mental health problems and is co-author of *Optimum Nutrition for your Child’s Mind* and *The Alzheimer’s Prevention Plan*. Deborah is a member of the British Association for Nutritional Therapy.

Lol Willcocks is the clinic manager. She works with patients to organise appointments, arranges biochemical testing with laboratories, and handles all administrative matters.

We work together as a team to ensure you receive the best possible care and attention.

The Mental Health Project board of advisors includes:

- Lady Diana Whitmore (psychotherapy)
- Dr Abram Hoffer (schizophrenia)
- Dr James Braly (addictions, food allergy, gluten sensitivity and methylation abnormalities)
- Dr Tapan Audhya (neurotransmitter testing)
- Dr Neil Ward (clinical chemistry)
- Dr Hyla Cass Assistant Clinical Professor of Psychiatry at UCLA School of Medicine (nutritional psychiatry)
- Amelia Mustapha (Depression Alliance)
- Sally Bunday (Hyperactive Children’s Support Group)
- Professor A. David Smith D Phil (Alzheimer’s Disease)

For more detailed information on the Brain Bio Centre and the ‘optimum nutrition’ approach to mental health:

- Visit [www.brainbiocentre.com](http://www.brainbiocentre.com)
- Purchase an Information Pack by sending a cheque for £4.99 payable to the Brain Bio Centre Avalon House, 72 LowerMortlake Road, Richmond, TW9 2JY. Telephone 020 8332 9600 or download for free from [www.brainbiocentre.com](http://www.brainbiocentre.com)
- Read *Optimum Nutrition for the Mind* by Patrick Holford (Piatkus, £12.99).
- *Optimum Nutrition for your Child’s Mind* by Patrick Holford & Deborah Colson (Piatkus, £10.99)
- *The Alzheimer’s Prevention Plan* by Patrick Holford & Deborah Colson (Piatkus, £9.99)

To order call 020 8871 2949 or visit [www.patrickholford.com](http://www.patrickholford.com)
DESCRIPTION OF CONSULTATIONS AND TESTS

Consultations
As soon as we receive your Patient Information Questionnaire we will contact you to make an appointment. The Initial Appointment with your clinical nutritionist (and a Brief Psychiatric Assessment with our psychiatrist if necessary) would involve a review of your health history.

An initial analysis is made and recommendations on tests given. Once test results are available, a 1 hour Follow-up Appointment with the clinical nutritionist will be arranged to explain the test results and to provide dietary and supplement recommendations.

Further Follow-up Appointments with the clinical nutritionist are generally for half an hour, unless you feel you may need longer to discuss your progress.

A 20 minute Brief Psychiatric Assessment appointment with our psychiatrist may be required prior to the Initial Appointment with the clinical nutritionist. We will advise you about this when booking your appointment. A more extensive Full Psychiatric Assessment appointment (40 minutes) with the psychiatrist is also available to anyone at any time.

In general, most people meet with a clinical nutritionist three to four times over the course of about six months. They may also meet with the doctor once or twice.

Tests
All of these tests are available and the nutritionist will discuss with you which ones are most appropriate for you.

Food Allergies
Quantitative ELISA IgG analysis
Food allergies can contribute to a variety of symptoms and disorders including depression, fatigue, ‘brain fog’, anxiety, psychosis, ADHD and autism. Two food allergy tests are available:

The FoodScan Indicator Test assesses whether or not there is an IgG antibody response. It does not identify the specific food or foods triggering this response. It is a screening test to determine if the FoodScan 113 test is appropriate.

The FoodScan 113 Test assesses IgG antibody response to 113 commonly eaten foods including grains, dairy products, meats, fish, nuts, vegetables, fruits, herbs and spices.

Neurotransmitter Imbalances
Blood platelet levels of neurotransmitters
This test requires venous blood (i.e. drawn from a vein). Blood will need to be drawn at a private practice in central London. Levels of platelet determinations of serotonin, noradrenaline and plasma acetylcholine are measured. An imbalance in these neurotransmitter levels is principally associated with symptoms of depression and lack of drive.

Histamine Imbalance
Blood plasma
This test requires venous blood (i.e. drawn from a vein). Blood can be drawn at a private practice in central London. An imbalance in histamine is associated with symptoms of schizophrenia and depression.

Mineral Imbalances
Hair mineral analysis
This test requires a small sample of hair (about 2 teaspoons) taken from the back of the head. The hair sample must be untreated (i.e. not dyed or permed) and cut close to the scalp. If scalp hair is not available, then sweat may be used. Deficiencies, excesses or imbalances of minerals including toxic metals may contribute to a variety of symptoms including paranoia, anxiety, aggression, depression, poor memory and concentration.

Homocysteine
Blood plasma
This test requires a sample of blood. Homocysteine is a potentially harmful sulphur bearing amino acid produced in the body. Elevated levels of homocysteine in the blood may be related to Alzheimer’s, depression, schizophrenia and autism.
**Urinary Peptide Test**

**Urine samples**
An early morning urine sample is collected, frozen and returned to the laboratory. The sample is then tested for chains of amino acids (peptides). Elevated levels of these peptides result from partially undigested milk or gluten foods being absorbed into the blood stream. Most of the peptides are flushed out of the body in the urine but a small proportion will cross into the brain and interfere with function. This often results in the symptoms such as autistic spectrum disorders and learning and behavioural problems.

**Comprehensive Stool Analysis**

**Stool samples**
The test kit contains full instructions and all equipment required to perform this test at home, plus self-addressed packaging to return the sample to the laboratory. Two samples must be provided on consecutive days. The Comprehensive Stool Analysis offers a comprehensive view of the health of the gastrointestinal tract, with information about digestion, absorption, bacterial balance, yeast overgrowth, inflammation, metabolic activity, and immune function. Imbalances in any of these areas can produce a variety of symptoms, as gut health may directly or indirectly affect mental health.

**Kryptopyrroles**

**Urinary reagent analysis**
This test requires a urine sample. Pyroluria, which is an elevated level of kryptopyrroles in urine, may be a factor in depression, psychosis, anxiety and autism.

**Adrenal Stress Index**

**Saliva samples**
Four saliva samples are collected at home over a 24 hour period. The test assesses the body's free-circulating, biologically active hormones of cortisol and DHEA. This shows how well the body is coping with emotional, physical and chemical stresses. Symptoms of anxiety, stress, depression, fears, fatigue, ‘brain fog’, lack of drive, are associated with imbalances in cortisol and DHEA.

**Female Hormone Panel**

**Saliva samples**
This test analyses eleven saliva samples over a 28-day period for the levels of β-estradiol, progesterone, and testosterone. This test may be useful if mental health symptoms are related to hormonal cycle.

**Detoxification Capacity Profile**

**Urine and saliva samples**
Saliva samples are collected following the ingestion of a premeasured amount of caffeine, while urine is collected following the ingestion of aspirin and acetaminophen (Paracetamol). The test assesses the body’s capacity to detoxify environmental and gut-derived toxins and the body’s own hormones and other compounds. This test is useful if it is suspected that the mental health symptoms are related to toxic exposure, hormonal imbalances, gut dysbiosis or a history of drug or alcohol abuse. Associated symptoms may include eczema, joint aches, and mental health symptoms that are worse after eating.

**Parasitology**

**Stool samples**
The test kit contains full instructions and all equipment required to perform this test, plus self-addressed packaging to return the sample to the laboratory. Two samples must be provided on consecutive days. Parasitology detects the presence of intestinal parasites including amoebae, flagellates, ciliates, coccidian and microsporidia.

**Gut Permeability**

**Urine samples**
This test involves collecting samples before and after consuming a premeasured challenge drink containing lactulose and mannitol. The kit includes full instructions plus challenge drink and collection containers. This test assesses intestinal permeability and absorption levels. Intestinal permeability may lead to increased burden on detoxification systems, the development of food allergies and autoimmune conditions. It has been associated with autism, schizophrenia and psychosis.
**FEE SCHEDULE**

To see what is included please see our Description of Consultations and Tests information sheet.

### Payments

A deposit of £50 must be included with each completed Patient Information Questionnaires.

Cancellation fee (if less than 2 working days notice given) is the full consultation fee.

Test fees are payable on ordering.

Consultation fees are payable at the time of the consultation

You have the right to opt out of any tests that you have ordered within 14 days provided that you give written notice and return any home test kits unused. You will receive a full refund less 15% administration charge.

We accept cash, cheques, postal orders and all major credit and debit cards.

Cheques and postal orders should be made payable to the Brain Bio Centre.

Prices are subject to change without notice.
1. Payment

1.1 A deposit of £50 is required to process an application and make an initial appointment.

1.2 Balance of payment for consultations will be payable no later than the day of consultation.

1.3 Payment for tests must be made at the time of purchasing/ordering the tests.

1.4 A current schedule of all fees can be found in ‘Fee Schedule’.

2. Cancellations and Refunds

2.1. Cancellations of all booked consultations must be made no later than 2 working days before the consultation.

2.2. Cancellations made within 2 working days of scheduled consultation or no shows will be subject to a cancellation fee of charge of the full consultation fee.

2.3. Tests that have been arranged and paid for may be cancelled within 14 days. To cancel, give written notice and return the home test kits which must be unopened. Money will be refunded in full less 15% administration charge.

We reserve the right to change our fees without notice.

Your Right to Cancel

Persuant to the Consumer Protection (Distance Selling) Regulations 2000

This notice fulfils the requirement set out in Regulation 7:

(1) The supplier of the services is the Brain Bio Centre Ltd, Avalon House, 72 Lower Mortlake Road, Richmond, TW9 2JY. Tel: 020 8332 9600 email: info@brainbiocentre.com

(2) This is a contract for the booking, administration and provision of assessment and remediation services for mental health conditions.

(3) Delivery or postage may be charged.

(4) Payment arrangements are set out in the Fee Schedule. You may pay by cheque, cash, or major credit card.

(5) You have the right to cancel this agreement within 7 working days after the day on which you send your questionnaire to us. To cancel you must contact us in writing at the address in (1).

(6) If you have any complaints please contact us in writing at our address set out in (1).

(7) In addition to your statutory right to cancel out above, you have the contractual right to terminate the contract at any time. But you will remain liable to pay any outstanding fees (including fees for sessions booked but not attended unless they were cancelled giving the notice required in our terms and conditions and returning any unused tests kits).

Data Protection

Information about the patient will be stored by the Brain Bio Centre for the purposes of monitoring the progress of his/her programme. Such information includes personal data relating to the patient’s health record and brief details of their family unit. Brain Bio Centre has taken measures to keep such information secure and our policy is not to disclose it to a third party other than those professionals directly involved in the programme. We use other (non-medical) personal information provided by patients and their parents or guardians for the purposes of administration, including collection of money due to use, for which purpose the information may be disclosed to debt collection and tracing agencies.

Returning the Patient Information Questionnaire signed by the patient, or by a parent or guardian if the patient is under 18 years old, constitutes the patient’s express written consent to the processing of such data. Any queries regarding the processing of personal data may be directed to the Brain Bio Centre Clinic Manager who is responsible for data protection matters.

**QUESTIONS FOR WOMEN ONLY**

Have you had any hormonal treatment? (e.g., contraceptive, HRT)         |          |        |       |            |
Have you experienced fertility problems or had a miscarriage?           |          |        |       |            |
Are you post menopausal?                                                 |          |        |       |            |
Are many of your symptoms related to your menstrual cycle?              |          |        |       |            |
TERMS AND CONDITIONS

1. Payment
1.1 A deposit of £50 is required to make an appointment. This deposit is deductible from the consultation fee for the first appointment.
1.2 Balance of payment for consultations will be payable no later than the day of appointment.
1.3 Payment for tests must be made at the time of purchasing/ordering the test kits.
1.4 A current schedule of all fees can be found in ‘Fee Schedule’.

2. Cancellations and Refunds
2.1 Cancellations of all booked appointments must be made no later than 2 working days before the appointment.
2.2 Cancellations made within 2 working days of scheduled appointment or no shows will be subject to a cancellation charge of the full consultation fee.
2.3 Tests that have been arranged and paid for may be cancelled within 14 days. To cancel, give written notice and return the test kits which must be unopened. Money will be refunded in full, less 15% administration charge. We reserve the right to change our fees.

Your Right to Cancel
Pursuant to the Consumer Protection (Distance Selling) Regulations 2000. This notice fulfils the requirement set out in Regulation 7:

1) The supplier of the services is Brain Bio Centre, Avalon House, 72 Lower Mortlake Road, Richmond, TW9 2JY, Tel: 020 8332 9600. email: info@brainbiocentre.com
2) This is a contract for the booking, administration and provision of assessment and remediation services for mental health conditions.
3) Delivery or postage may be charged.
4) Payment arrangements are set out in the ‘Fee Schedule’. You may pay by cheque, cash, or major credit card. We do not accept American Express.
5) You have the right to cancel this agreement within 7 working days after the day on which you receive the information. To cancel, you must contact us in writing at our address as set out in (1).

6) If you have any complaints please contact us in writing, at our address as set out in 1).
7) In addition to your statutory right to cancel as set out above, you have the contractual right to terminate the contract at any time. But you will remain liable to pay any outstanding fees (including fees for sessions booked but not attended unless they were cancelled giving the notice required as outlined in our terms and conditions and returning any unused tests kits).

Data Protection
Information about the patient will be stored by the Brain Bio Centre for the purposes of monitoring the progress of his/her programme. Such information includes personal data relating to the patient’s health record and brief details of their family unit. Brain Bio Centre has taken measures to keep such information secure and our policy is not to disclose it to a third party other than those professionals directly involved in the programme. We use other (non-medical) personal information provided by patients and their parents or guardians for the purposes of administration, including collection of money due, for which purpose the information may be disclosed to debt collection and tracing agencies. Returning the Patient Information form signed by the patient, or by a parent or guardian if the patient is under 18 years old, constitutes the patient’s express written consent to the processing of such data. Any queries regarding the processing of personal data may be directed to the Brain Bio Centre Clinic Manager at the Brain Bio Centre who is responsible for data protection matters.

Evaluation and research
Anonymised patient information and test results may be used in the evaluation of Brain Bio Centre treatment protocols to contribute to the continual improvement of the effectiveness of our treatment programmes.

PATIENT TO SIGN HERE
I have read and agree to the terms and conditions outlined above.

Rejects Affection  □ Nail Biter  □ ‘All Over the Place’
Sleepy  □ Agile  □ Clumsy

Medical History

How many courses of antibiotics has the child taken over the past 3 years? (Please tick)
☐ none  ☐ 1-3 courses  ☐ 4-9 courses  ☐ more than 10 courses
Does/has your take/taken any other prescribed medications?  Yes/No
If yes, please give age, illness and treatment ______________________________________

Does your child take over the counter medications?  Yes/No
If yes, which and what for? ______________________________________
Has your child ever been referred to a specialist? Yes/No
If yes, please give age, reason and type of specialist: ____________________________________________

What tests has your child had done by GP, specialist, other? ___________________________________

Has your child received medical diagnosis of any condition? Yes/No
If yes, please expand (e.g. Asthma, Coeliac Disease, Anaemia) ___________________________________

Have you sought ‘alternative health care advice for your child e.g. Homeopath, Cranial Osteopath Yes/No
If yes, please state which: ___________________________________________________________________

Does your child have a history of contracting any viral infections? Tick all that apply
☐ none            ☐ encephalitis    ☐ meningitis       ☐ chicken pox             ☐ measles
☐ mumps           ☐ rubella          ☐ unknown viral infection
☐ other, please specify

Does your child have a history of epilepsy or seizures? Yes / No
If yes, please specify type of epilepsy, date of diagnosis and date of last episode: _______________

Does your child have a history of bacterial or fungal infections? Tick all that apply.
☐ none            ☐ oral thrush      ☐ genital thrush   ☐ athletes foot          ☐ impetigo
☐ other, please specify

Does your child have any history of the following problems with their ears? Tick all that apply.
☐ none            ☐ hearing loss     ☐ persistent ear infection ☐ redness of ears    ☐ use of grommets/tubes
☐ other, please specify

Does your child have any history of the following problems with their eyes? Tick all that apply.
☐ none            ☐ loss of sight    ☐ dark rings around the eyes ☐ squint
☐ other, please specify

Additional medical information? ________________________________________________________________
List any previous major illnesses ________________________________________________________________
List any operations that the child has had __________________________________________________________

Immunisation Programme

Has your child received the recommended standard immunisations? Yes/No
If no, please detail those given and those excluded and why: _______________________________________

Has your child ever had an adverse reaction to any vaccine? Yes/No
If yes, please specify ________________________________________________________________

Does your child suffer from frequent colds, coughs infections? Yes/No

Does your child have eczema, asthma, hayfever, arthritis? Please underline which

Does your child suffer from food sensitivity? Yes/No

Have you noticed any adverse reactions in your child after eating certain foods? Yes/No
If yes, state which foods and what reactions ______________________________________________________
Development History

Has your GP or any other medical practitioner ever expressed concern regarding your child’s development?  Yes/No

If yes, please expand e.g. speech, learning, walking etc ______________________________________________________

Have there been any hearing problems?  Yes/No

Has your child’s growth been ‘normal’ e.g. Height, Weight, Growth Centile  Yes/No

If no, please detail ___________________________________________________________________________________
__________________________________________________________________________________________________

Digestive Profile – please circle as appropriate

Does your child chew food well?  Yes/No  Does your child suffer from bad breath?  Yes/No

Does your child suffer tummy upsets?  Yes/No  Does your child suffer with an itchy bottom?  Yes/No

Does your child have a daily bowel movement? Yes/No  Does your child suffer from diarrhoea?  Yes/No

Does your child suffer from constipation? Yes/No  Does your child suffer from bloating/excessive wind  Yes/No

Are the stools normal, pale, offensive, floating (please underline which)

Does your child have a history of bowel problems?
☐ no  ☐ yes  ☐ don’t know

Is your child fully bowel continent (i.e. not using a nappy at all during the day or night)?
☐ no  ☐ yes  ☐ don’t know

Type of bowel problem. Tick all that apply
☐ diarrhoea  ☐ constipation  ☐ alternating diarrhoea/constipation  ☐ undigested food in stools
☐ blood in stools  ☐ mucus in stools  ☐ loose stools
☐ other, please specify ___________________________________________________________________________________

How long have the bowel symptoms been present? Tick one box only.
☐ 0-3 months  ☐ 4-6 months  ☐ 7-12 months  ☐ more than a year

TERMS AND CONDITIONS

1. Payment
1.1 A deposit of £50 is required to make an appointment. This deposit is deductible from the consultation fee for the first appointment.
1.2 Balance of payment for consultations will be payable no later than the day of appointment.
1.3 Payment for tests must be made at the time of purchasing/ordering the test kits.
1.4 A current schedule of all fees can be found in ‘Fee Schedule’.

2. Cancellations and Refunds
2.1 Cancellations of all booked appointments must be made no later than 2 working days before the appointment.
2.2 Cancellations made within 2 working days of scheduled appointment or no shows will be subject to a cancellation charge of the full consultation fee.
2.3 Tests that have been arranged and paid for may be cancelled within 14 days. To cancel, give written notice and return the test kits which must be unopened. Money will be refunded in full, less 15% administration charge. We reserve the right to change our fees.

Your Right to Cancel
Pursuant to the Consumer Protection (Distance Selling) Regulations 2000. This notice fulfils the requirement set out in Regulation 7:
1) The supplier of the services is Brain Bio Centre, Avalon House, 72 Lower Mortlake Road, Richmond, TW9 2JY, Tel: 020 8332 9600. email: info@brainbiocentre.com
2) This is a contract for the booking, administration and provision of assessment and remediation services for mental health conditions.
3) Delivery or postage may be charged.
4) Payment arrangements are set out in the ‘Fee Schedule’. You may pay by cheque, cash, or major credit card. We do not accept American Express.
5) You have the right to cancel this agreement within 7 working days after the day on which you receive the information. To cancel, you must contact us in writing at our address as set out in (1).

6) If you have any complaints please contact us in writing, at our address as set out in 1).
7) In addition to your statutory right to cancel as set out above, you have the contractual right to terminate the contract at any time. But you will remain liable to pay any outstanding fees (including fees for sessions booked but not attended unless they were cancelled giving the notice required as outlined in our terms and conditions and returning any unused test kits).

Data Protection
Information about the patient will be stored by the Brain Bio Centre for the purposes of monitoring the progress of his/her programme. Such information includes personal data relating to the patient’s health record and brief details of their family unit. Brain Bio Centre has taken measures to keep such information secure and our policy is not to disclose it to a third party other than those professionals directly involved in the programme. We use other (non-medical) personal information provided by patients and their parents or guardians for the purposes of administration, including collection of money due, for which purpose the information may be disclosed to debt collection and tracing agencies. Returning the Patient Information form signed by the patient, or by a parent or guardian if the patient is under 18 years old, constitutes the patient’s express written consent to the processing of such data. Any queries regarding the processing of personal data may be directed to the Brain Bio Centre Clinic Manager at the Brain Bio Centre who is responsible for data protection matters.

Evaluation and research
Anonymised patient information and test results may be used in the evaluation of Brain Bio Centre treatment protocols to contribute to the continual improvement of the effectiveness of our treatment programmes.
