Here are a few stories about the miracle working power of Reiki. Many of them are documented by before and after medical tests and the observations of licensed health care providers. Please note that while Reiki can cause miraculous healing, it does not always do so. However most patients receive some level of healing with the minimum benefit being relaxation and stress reduction. If you have a medical or psychological condition, it is recommended that you use Reiki in conjunction with the help of a licensed health care provider. These stories are excerpted from a forthcoming book titled Reiki Stories.

Reiki and Cancer

For the last 20 months I have been treating two ladies who both had cancer. Both went through all the normal medical treatments and followed their specialists’ advice. Each one attended a weekly session of Reiki healing, and I treated them both in the same way. The first lady showed remarkable results as my visualizations, prayers and work began to slice, snip, and unwind a large lump in the cancerous area. Initially her scan showed that the lump had become “see through” and less dense. This type of progress continued for three months, with the lump getting smaller each time. All of this work happened prior to my reading about how to perform psychic surgery. After Christmas of that year I studied the ICRT Master Manual and asked permission to use the technique. The client agreed that anything was worth a try. I read and re-read and prepared my own shortlist of what to do. I then followed the procedure very closely and gradually the “growth” began to reveal a shape, color, name, size, etc., and one day it actually “burst” out of the client’s back like a red golf ball. The following week she awoke to find the red ball banging to get back into her back! All of the treatments resulted in the release of emotional sufferings of anger, rage, hurt, and old resentments from a very young age. Counseling and serious discussion of all of the issues followed the releases. During each session some strange object was released and sent directly to the violet flame and up to God. There are far too many to describe here, but among them were: a worm, a coiled snake, a black beetle with blue spots, something “chuckling,” something “hiding” (evidently from me—the healer!!). In the end she was completely healed of her cancer.

The coincidences between this client and the second client were quite remarkable. They did not know or have any contact with each other, and no information was ever revealed to either about the other. The second client began with a large “black thing” flying off the top of her head. At one stage she also felt and “saw” a red ball shoot out from the solar plexus area! Equally each revelation brought all the old pains and stresses from several years ago, and it easily related to the time the cancer started.

During many of the treatments both clients were aware of “other hands” working and actually saw several other people on different occasions. Indeed there are so many strange but wonderful situations that are far too numerous to mention. The information from both case studies has been a massive learning curve for me and I know that Reiki is the most magical gift this world can possess. I need also to state that healing powers came to my hands before I had heard of Reiki, but since the continuing study and practice to become a Reiki Master, the healing power is absolutely staggering. Both clients experienced considerable healing and one is completely healed. The other is making wonderful progress and continues to come for treatments, which leave her feeling filled with sparkling energy.

I completely love the work that I am doing and hope that one day Reiki will be spread far and wide. It is the positive joy of Love that allows release of the negative powers of the opposite. Nothing can defeat Love, which has patience, kindness and forgiveness all rolled into the very meaning of the word.

Thyroid Cancer

I was diagnosed with thyroid cancer in 1998, just after graduating from massage therapy school. After considering many options, I decided to have the right portion of my thyroid removed, because the only way to confirm a pathology report was to remove the gland. All was successful; however, during an annual routine sonogram of my left thyroid, another “nodule” was found in September 2003. Several doctors recommended that I
have surgery as soon as possible, due to the previous finding of thyroid cancer. I requested to delay the surgery for three months and then repeat the sonogram. My endocrinologist agreed.

I performed Reiki on myself every night before bed, from September 2003 to December 2003. When I went for my follow-up sonogram of the left thyroid portion, the nodules "were gone." I truly have no doubt that my Reiki sessions made this possible for me. Not only was I able to avoid another surgery, no additional costs were necessary for any additional treatments.

Epilepsy Healed

I was diagnosed with grand mal epilepsy in October 2006, after having my first tonic-clonic seizure while at work. Over the course of the next six months, I endured weeks in hospital with electrodes glued to my head and withstood medication after medication—all of which proved fruitless. In fact, my seizures increased to a dozen every three weeks. I really had gotten to a point where I thought my life was over.

In April of 2007, Diana gave me a Reiki treatment. I knew something had happened during the treatment. We both commented on the incredible heat developing in the space between her hands and my head and shoulders. Today is the 29th of November. I have gone that entire time seizure-free, and for the last three months have reduced and stopped ALL epilepsy medication. Over this six-month period, I have had long-distance treatments, which I firmly believe have maintained and strengthened my developing wellness.

Reiki Heals Bilirubin Count

My new grandson was born May 12th. I felt an immediate connection to him since I was present at his birth. We had him home all of 24 hours when we were notified that he had to be immediately hospitalized at the NICU for blood and bilirubin problems. He had a bilirubin of 24 upon admission and they would not release him until the level decreased to 9-10. Each day his count only decreased a point or two at a time, despite being under bilirubin lights for 24 hours a day. By the fourth day of his hospitalization, it was only down to 17.8, and it didn’t look very promising for a discharge home yet. I decided to go to bed early that night, and it suddenly dawned on me that I should send Reiki. (Duh!) While I was sending the Reiki, I began saying things that just came out of my mouth without thinking. I told him that grandma was sending and surrounding him with white healing light, brighter and stronger than the bilirubin lights he was under. When I was done with my session, the number 10 came to my mind. I went to sleep. The first thing next morning we called the hospital to see what the 5 AM reading was and if it had decreased at all. I knew in my heart it had, but when my daughter-in-law started laughing and crying, I knew it was good. Not only had his bilirubin “remarkably” dropped to 10, but he was going to be discharged that day!!! I called my husband to report this miracle, and his response was, “What took you so long?”

Reiki Helps Stroke Victim

One morning, this past June, I received a telephone call from the manager of the Senior Apartment building where my daughter-in-law Betsy’s grandmother resided. The grandmother had collapsed in her apartment and was discovered when a friend stopped to check on her. Gram was taken to a local hospital ER, and it was confirmed that she had suffered a stroke. Gram was unresponsive, and the doctor said her chances of regaining consciousness were “very slight.” The doctor stated he had doubts that Gram would survive until Betsy, who was eight hours away, could get here. The ER staff checked her records and verified she did have a Living Will and a DNR order on file from previous hospitalizations.

I did not want to leave Gram alone. I stayed with her throughout the day. After approximately six hours, I decided I would give her Reiki. It was so amazing; within 45 minutes of completing the Reiki she began to move one hand, then her entire arm. By the time the orderly arrived to transfer her to a room and admit her, she was making sounds and upon arrival in her room she was trying to get up from the gurney. The nurses had to restrain her to prevent her injuring herself.

The next morning the medical staff was amazed that she recognized Betsy and by evening was communicating verbally. Within the next few days she regained her speech, vision, and mobility, and was sent to a rehab center for therapy. A second stroke occurred within two weeks time. This put Gram into a deep coma from which she did not recover. She died peacefully.

I continued sending distant Reiki throughout her illness. I feel strongly the Reiki provided time for her three grandchildren (her only living relatives) to travel here and spend time with her before she passed away.

Last August I received my Reiki Master attunement. Unfortunately I live in an area that is not yet receptive to “new” alternative methods of treatment. But, I am jumping on every opportunity to spread my knowledge and abilities to make others aware of the wonderful world of Reiki.

—Ann McCray

If you have a Reiki Story, we would love to read it so we can consider publishing it in this column. Please send your Reiki Story by email to: ReikiStories@reiki.org or by regular mail to Reiki Stories, Vision Publications, 21421 Hilltop, #28, Southfield, MI 48033.

Thanks a lot for sharing, William.
